**The Failure of Ketchum & Co.--A Card from that Firm--Its Effect in Wall Street--The Connecticut Banks, Etc., Etc.**

NEW YORK, Aug. 17.—But little additional has transpired in connection with the failure announced this morning. Young Ketchum's misfortune is now estimated at $1,000,000.

Messrs. Lounsbery, Ketchum, Gale & Co. have made an assignment for the benefit of their creditors. The assignment is to Mr. H. C. Calhoun, President of the Fourth National Bank, and Mr. Lounsbery, formerly a partner in the firm of Ketchum, Hyatt & Lounsbery. Mr. Calhoun is a brother of Mr. Edward Ketchum, and has been retained by the latter.

NEW YORK, Aug. 17.—The Commercial says Mr. Ketchum, Son & Co. have made an assignment to Mr. H. C. Calhoun, President of the Fourth National Bank, and Mr. Lounsbery, formerly a partner in the firm of Ketchum, Hyatt & Lounsbery. Mr. Calhoun is a brother of Mr. Edward Ketchum, and has been retained by the latter.

NEW YORK, Aug. 17.—The Commercial says the check issued by Ketchum, Son & Co. for $1,000,000 over has been found, with three hundred and fifty checks missing, which, if all were used by him, would make his liabilities $1,350,000, with the usual collateral security, and probably fifty thousand dollars.

NEW YORK, Aug. 17.—The excitement attending the failure of Ketchum, Son & Co. has been intense and could not appear to be steadily returning to their former condition. There is still a current belief that the collateral and securities arising from the depositation that the effects of the failure of two large banks have not yet been fully developed, and that this morning containing the following: Ketchum, Son & Co. have made an assignment to Mr. H. C. Calhoun, President of the Fourth National Bank, and Mr. Lounsbery, formerly a partner in the firm of Ketchum, Hyatt & Lounsbery. Mr. Calhoun is a brother of Mr. Edward Ketchum, and has been retained by the latter.

NEW YORK, Aug. 17.—The Commercial says Mr.

THE CHOLERA—PLAGUE—HUMANE PRECAUTIONS OF THE CHOLERA—HOW TO STAY IT.

Advices from Cairo to the 17th of July say there is more cholera there now than at any previous time, and the mortality is frightful. Many of the cases terminate fatally in a few hours, and the patients are in a state of collapse. The disease is of the most violent character, and the mortality is fearful. Of the foreigners, the Greeks suffer most. Of the natives, the Copts are the greatest sufferers. The disease is confined to no locality, but is in the midst of the city, and in the suburbs. The number of deaths is estimated at 1,000 per day. The latest accounts from Alexandria state that the cholera is not there, but that the plague is raging with fearful violence. It is breaking out in the interior towns, and there is no limit to the number of deaths. The disease is confined to no locality, but is in the midst of the city, and in the suburbs. The number of deaths is estimated at 1,000 per day. The latest accounts from Alexandria state that the cholera is not there, but that the plague is raging with fearful violence. It is breaking out in the interior towns, and there is no limit to the number of deaths.

MURDER OF THE "BLACK PLAGUE."

[From the Pall Mall Gazette.]

A similar outbreak of more violent disease, elsewhere of the "black plague," is raging breaks out at Shantoun. The description of the symptoms—the sudden attack of spasms, hiccups, and thirst, and that the patients almost invariably die in a few hours—is the latest account from that locality; so that medical men can only conjecture that the disease is identical with the cholera of India. Carbolic powder is the only remedy hitherto known to have any effect in checking the disease. A lady friend of Mrs. Ashhurst Biddulph gives her daughter a dose of this powder at the first symptom of cholera, and the child recovered. Mrs. Biddulph has also administered it with success in other cases.

THE BOMBAY CATTLE MURRAIN IN SCOTLAND.

At a meeting held in London on the 21st ult., the Highland Society of London, to which many noble names adorn the following details of the cattle plague in Scotland, under the auspices of the Scottish Metropolis:

The first appearance of the malady was at Carlisle, on the 3rd of April, three days after it broke out in London. It was stated that the disease was introduced into Carlisle by a cow which arrived by the train from London. It was supposed to have been infected by the cattle which had been exposed for sale in the Metropolitan Cattle Market on the 15th or 16th of March, and which, on the 17th, were sold by auction at Carlisle. Communications beyond the circle of the metropolis, and the cattle which had been placed in a quarantine shed, other cases of the disease appeared in Carlisle, and on the 24th of April, Indeed, it was stated, the disease was prevalent in the city. Communications were then made to the Privy Council, and to the Board of Trade, and the result has been the issue of the Proclamation and Orders which are now in force. The Highland Society, however, has had communications from various parts of the country, and from all of which it appears that the disease is confined to the cattle which have been exposed for sale in the Metropolitan Cattle Market on the 15th or 16th of March, and which, on the 17th, were sold by auction at Carlisle.
